Contact : +91-7448517357

OBJECTIVE

Aspiring Artificial Intelligence and Data Science student with strong interest in Java and Python. Eager to apply problem-solving skills in real world challenges. Aiming to contribute effectively to innovate projects in a dynamic tech environment. Seeking an opportunity to enhance my skill and grow as a professional

EDUCATION

V.S.B College of Engineering Technical Campus

2023 - 2027

(Affiliated to Anna University, Chennai)

Coimbatore

B.Tech Artificial Intelligence and Data Science | CGPA : 8.07

Bhaarath Vidhya Bhavan Matriculation Higher Secondary School

2022 - 2023

Higher Secondary Certificate (HSC) | 69.5%

Palani

KEY SKILLS

- **Programming Languages** : Java, Python
 - **Version Control** : Git
 - **Database** : SQL
 - **Soft Skills**: Adaptability, Communication, Leadership & Teamwork
-

PROJECTS

DataSense AI

- Developed DataSense AI, an end-to-end data science platform for automated data preprocessing, exploratory data analysis, feature engineering, and predictive analytics using Python, Pandas, NumPy, and Scikit-learn
- Implemented machine learning, time-series forecasting, customer segmentation, and anomaly detection with model evaluation and SHAP-based explainability to generate actionable business insights
- Built an interactive analytics platform using FastAPI and Streamlit, integrating data visualization, prediction APIs, automated insights, and business recommendations into a production-oriented data science workflow

Review AI

- Developed ReviewAI, an AI-powered code review platform integrating GitHub APIs and webhooks to automatically analyze Pull Requests and identify bugs, security vulnerabilities, performance issues, and code smells
- Implemented intelligent static analysis and LLM-based review workflows to generate code quality scores, explain detected issues, and recommend best-practice fixes, reducing manual review effort and improving developer productivity

- Designed a full-stack web application with repository analysis, interactive review dashboards, issue tracking, and AI-generated review reports, enabling developers to perform comprehensive code quality assessments before deployment
-

EXPERIENCE

British Airways | Data Science Intern

Dec 2025

- Analyzed customer and operational dataset to identify business trends and performance insights, delivered data-driven recommendation to support strategic decision-making using visualization
- Applied data cleaning, exploratory data analysis and visualization techniques to real world business data, generated actionable insights by identifying patterns, customer behaviours
- Developed analytical solutions using data science methodologies to solve business challenges, Improved decision-making by presenting clear insights through visualization and structured reports

Litz Tech | Cloud Computing Intern

Jun 2025 - July 2025

- Gained hands-on experience with cloud platform (AWS/Azure), provisioning virtual machines, storage and networking resources for real-world infrastructure tasks
 - Learned core cloud service models(IaaS, PaaS, SaaS) and applied this knowledge to evaluate suitable solutions for different use cases
 - Explored public, private and hybrid deployment modes, gaining insight into trade-offs around scalability, security and cost
-

CERTIFICATIONS

- GUVI | HTML & CSS Course Completion *Jun 2025*
 - INFOSYS SPRINGBOARD | Machine Learning using Python *Apr 2025*
-

RESEARCH ACHIEVEMENTS

- Published an article titled “AI Techniques for Air, Water and Soil Pollution Monitoring” in the International Journal Research Publication Analysis(Volume 2, Issue 1) *Jun 2024*
 - Registered a patent titled “Advanced Ad-Hoc Network Security: Leveraging AI Algorithm for Enhanced Protection” in the Intellectual Property of India *Sep 2024*
-

DECLARATION

I hereby declare that all the information provided above is true and correct to the best of my knowledge
